

Incubation Center

In our Incubation Center, we support start-ups and companies that develop barrier-free products or services that support people with disabilities.

New technologies and approaches open up a variety of possibilities for people with disabilities. That is why we wish to support new and established companies from Austria, Europe, and beyond in the development of new products or services

At the incubation centre we offer:

- Office facilities in Vienna from which to operate
- A comprehensive knowledge of the market and the relevant players
- Advice on the current legal and regulatory framework in Austria and Europe
- Networking and representation at national and international trade fairs
- Support in marketing
- Usability and Accessibility Tests
- 1:1 Mentoring
- Comprehensive infrastructure (barrier-free offices, 3D and Braille printers)

Work with us to shape a barrier-free future for people with disabilities.
